

# Non-Contact Temperature Measurement

**DIGITAL – INFRARED – 2 – COLOR – PYROMETER**

**Temperature range 600 to 3300°C (1112 - 5972°F)**

**Temperature control during production process**

**compact units – Infrared – measuring transducer and electronic process unit in one case with light beam aiming device or optical viewfinder, focusable optic, serial interface**

**Series QKTRD 1085**

MAURER – Infrared – pyrometer can also assist you to monitor your heating processes, ensuring a uniform standard of quality for your products.

# Infrared-Digital-Pyrometer Series QKTRD 1085

Mainly for **fast warming processes** the **contactless temperature measurement** is suitable.

The **series QKTRD 1085** are **digital-2-color-pyrometer** with vario-objective in compact structure likewise suitable for industry, research and laboratory.

2-color-pyrometer afford on the basis of it's measuring principle contrary to part radiation pyrometer a few substantial advantages. They show also still under critical conditions the true temperature, i.e. by absorption of smoke within the measuring path, mist of viewing glasses at ovens, by small parts which don't illuminate the measuring field.

With the integrated light beam aiming device (green LED or Laser) resp. viewfinder an adjusting of the pyrometer to the measuring object is very easy.

The temperature linear analog output signal 0/4 up to 20 mA is available for measuring- and controlling purposes.

The simultaneous using of the serial interface with the software IR-LOG enables the data detection, graphical representation and the parameter settings of the pyrometer.

## Examples for applications:

steel, iron, non-ferrous metal, coating, wires, molding, hardening, induction heating, soldering, metal melt, forging, welding, transforming, vacuum furnace, rolling

Technical datas:	
Unit types	QKTRD 1085-1
Target marking	light beam aiming device green LED or laser
Temp. measuring ranges:	MR1: 600-1600°C 1112-2912°F
Spectral range	0,85 - 1,1 µm and 0,95 - 1,1µm
Response time (t95)	<20 ms
Measuring uncertainty	0,5% of meas.value in °C ± 1°C (ε = 1, T <sub>amb.</sub> = 23°C, T <sub>95</sub> = 1s)
Reproducibility	0,1% of meas.value in °C ± 1°C (ε = 1, T <sub>amb.</sub> = 23°C, T <sub>95</sub> = 1s)
Emission ratio	0,8 – 1,2 adjustable at the unit or through interface
Emission factor ε	100 - 10 % through interface
Analog output	0 - 20 mA or 4 - 20 mA , load max. 500R
Part measuring ranges:	free adjustable within the measuring range
Resolution	< 0,1% analog output, < 0,1°C at interface
1 limit output (open coll.) "min. intensity"	24 V DC / max. 100 mA
Max.reading memory	max.memory, erasing after time, external contact, by software, double memory
Interface	RS 232 ± 50 V isolated
Software IR-LOG	data recording, graph.representation, setting of pyrometer parameters
adjustable parameter with Software IR-LOG	emissionfactor,switching output,analog output, part meas.range, °C/°F, max.memory, average value, light beam aiming device switchable
Objectives	for accommodation to the measuring application an extensive selection of objectives are available
Working temperature	pyrometer 0 - 50°C (32-122°F), optic system up to 150°C(302°F)
Stock temperature	- 10°C - + 70°C (14-158°F)
Temperature sensitivity	0,05 % / °C
Humidity tolerance	35 - 85 % RF (non condensing)
Operating voltage	24 V DC ± 10 % or 18 V AC ± 10 % < 160 mA
Unit connection	12-pole plug-connector
Dimensions: H / W / D	54 x 54 x 147 mm (2,13 x 2,13 x 5,79 inch) ALU-case
Weight	0,6 kg (1,32 lbs)
Protection grade	IP 65

mechanical assembly	electrical assembly	
Execution in cooling case	AE 1010 electr.process unit	digital display (built in-execution)
Blowing device	AE 1012 electr.process unit	connection cable 12-pole
Mirror 90°	power supply 230VAC - 24 VDC	line scanner SC 1000 / SC 1012
Mounting parts		

# Optic tables for KTRD 1065+1075+1085 and QKTRD 1075+1085
